PENNSYLVANIA LEGISLATURE.—On the 17th inst., the House of Representatives went into an election of a Speaker. On the first ballot, Thompson, of Venango, and Patterson, of Washington, were the highest—on the second ballot, the antimasons went for the latter gentleman, and he was elected. The Legislature have adjourned for ten days from to morrow.

TWENTY THIRD CONGRESS.

FIRST SESSION.

Monday, Dec. 16.—IN SENATE.—The Vice President of the United States this day took his seat in the Chair of the Senate, and delivered the following address:

SENATORS! On entering on the duties of the station to which I have been called by the People, deference to you and justice to myself require that I should forestall expectations which might otherwise be disappointed. Although for many years heretofore a member of the Senate, I regret that I should not have acquired that knowledge of the particular order of its proceedings which might naturally be expected. Unfortunately for me, in respect to my present condition, I ever found those at hand who had more correctly appreciated this important branch of their duties, and on whose opinions, as to points of order, I could at all times safely rely. This remissness will, doubtless, for a season, cause me no small degree of embarrassment. So far, however, as unremitting exertions on my part, and a proper respect for the advice of those who are better informed than myself, can avail, this deficiency will be remedied as speedily as possible; and I feel persuaded that the Senate, in the mean time, will extend to me a considerate indulgence.

But, however wanting I may be, for the time, in a thorough knowledge of the technical duties of the Chair, I entertain, I humbly hope, a deep and solemn conviction of its high moral obligations. I am well aware that he who occupies it, is bound to cherish towards the members of the body over which he presides, no other feelings than those of justice or courtesy—to regard them all as standing upon an honorable equality—to apply the rules established by themselves, for their own government, with strict impartiality—and to use whatever authority he possesses in the manner best calculated to protect the rights, to respect the feelings, and to guard the reputations of all who may be affected by its exercise.

It is no disparagement to any other branch of the Government to say, that there is none on which the Constitution devolves such extensive powers as it does upon the Senate. There is scarcely an exercise of constitutional authority in which it does not mediately or immediately participitate; it forms an important, and, in some respects, an indispensable part of each of the three great departments, Executive, Legislative, and Judicial; and is, moreover, the body in which is made effectual, that share of power in the Federal organization, so wisely allowed to the respective State sovereignties.

Invested with such august powers, so judiciously restricted, and so largely adapted to the purposes of good government, it is no wonder that the Senate is regarded, by the people of the United States, as one of the best features, in what they at least consider to be, the wisest, the freest, and happiest political system in the world. In fervent wishes that it may long continue to be so regarded, and in a conviction of the importance of order, propriety, and regularity in its proceedings, we must all concur. It shall be an object of my highest ambition, Senators, to join with you, as far as in me lies, in effecting those desirable objects; and in endeavoring to realize the expectation formed of this body, at the adoption of the Constitution, and ever since confidently cherished, that it would exercise the most efficient influence in upholding the Federal system, and in perpetuating what is at once the foundation and the safeguard of our country's welfare, the Union of the States. —*Nat. Intel.*

The Senate now proceeded to elect the Committees. The Chairman of the different Committees were first elected, then the other members.

The following are the Committees—the first named, of course, being Chairman—

On Foreign Relations—Wilkins, Rives, Forsythe, Sprague, and Mangum.

On Finance—Webster, Tyler, Ewing, Wilkins, and Mangum.

On Commerce—Silsbee, King, Wright, Waggaman, and Sprague.

On Manufactures—Frelinghuysen, Linn, Morris, Knight, and Prentiss.

On Agriculture—Brown, Robinson, Kent, Swift, and Wright.

On Military Affairs—Benton, —— Preston, King, and Clayton.

On Militia—Robinson, Hendricks, Waggaman, M'Kean, and Clayton.

On Naval Affairs—Southard, Bibb, Robbins, Tallmadge, and Chambers.

On Public Lands—Poindexter, Moore, Prentiss, M'Kean, and Clay.

On Private Land Claims—Kane, Linn, Naudain, Poindexter, and Silsbee.

The Senate adjourned before it had completed the remaining committees. We will therefore defer giving the names of the respective chairmen, until we can give the committees in full.

Monday, December 16.—In the House of Representatives, on motion of Mr. Stewart, the following joint resolution of the Legislature of Pennsylvania, passed at its last session, was referred to the Committee on Roads and Canals:

Resolved, That the Senators from this State in the Congress of the United States, be instructed, and the Representatives requested, to endeavor to procure the passage of a law authorizing the subscription of a million of dollars, on the part of the General Government, to the stock of the Chesapeake and Ohio Canal Company, to be expended on the western section.

A number of petitions were, as usual, presented, amongst which were the following:

By Mr. McKennan—eight memorials, from sundry inhabitants of the western and northwestern counties of Pennsylvania, praying for the construction of a national road from the Cumberland Road at Washington, Pennsylvania, by Georgetown, in Beaver county, to Lake Erie; which were referred to the Committee on Roads and Canals. Also, the memorial of the Trustees of Jefferson College, Washington county, asking for a donation in lands; which was referred to the Committee on Public Lands. Also, the memorial of George C. Seaton, an invalid pensioner of Washington county, Pennsylvania, praying for an increase of pension; which was referred to the Committee on Invalid Pensions.

Mr. Mercer presented the Memorial of the President, Directors, and Stockholders of the Chesapeake and Ohio Canal Company, asking further aid from Congress for carrying on said work.—[The Memorial was accompanied by a long and interesting report from Capt. W. G. McNeil, of the Topographical Engineers, upon the progress and state of the Canal.] The Memorial was referred to the Committee on Roads and Canals.

The subjoined is an extract from a gentleman of the highest character and respectability, in Philadelphia—one not personally engaged in commercial business, but who has every opportunity of viewing things as a calm spectator and competent observer of the money market.—*National Intel.*

"The very best paper is at 1 1-4 to 1 1-2 per cent. per month discount, out of doors. All the Southern Bank stocks, of which immense sums are saved, here and in New York, have greatly fallen, and loans on them cannot now be effected. Bills on London are nearly unsaleable, and the ordinary means of our Northern capitalists of paying for their purchases of Southern produce in Charleston, Savannah, and New Orleans, are paralyzed and rendered unavailable by the difficulty of disposing of drafts in those places on the northern cities. Under such discouragements remittances are embarrassed, produce must fall, all commercial operations are cramped. The State Banks are all afraid of discounting freely, knowing that the suspension of commercial confidence may strip them at any moment of the slender supplies of specie in their vaults; while the Bank of the United States is not only at ease, and secure, but holds the *impregnable position* which the President fancied he could give and hold for the Pet Banks.—*Girard bank* stock is fallen within a short time from $70 to $58, and the period is fast approaching when a suspension of *specie payments* will be the only means of preventing the stoppage of many of the State Institutions, who have been imprudently extending themselves without specie to rest upon. One of these Banks had the other day to ask for a delay of some days to enable it to pay over $20,000 placed there on interest, subject to repayment at any moment, and the notes of another neighboring one, are scarcely signed and dry and paid out, before they are returned upon them for specie."

Iron Ships.—The English, it is well known, have for a long time been constrained to import their materials for ship building. Their "hearts of oak" are now enormously expensive; and, in consequence of the competition, are becoming rapidly more so. This is a tax which no Parliament can reform. The hills of Old England are now too thickly populated to permit the growth of timber; and never perhaps to be renewed.

These facts have forced the English to think of new, more lasting, and therefore less expensive materials, for ship building. A writer in one of the English Magazines proposes the use of iron instead of wood. He alleges that several iron steamboats have been built, which have been completely successful; not only lasting much longer, but being proved in tempests much safer, than the "wooden walls" of the Navy. He adds—"The spirit of prophecy is not needed to convince us that many years cannot elapse ere iron will be substituted for wood in the construction of ships. Iron hulls, properly fitted with air tubes, would be unsinkable even if leaky. I have heard it said that the difference in prime cost would not be very considerable; and the increased demand for iron would tend to increase facilities in its manufacture. The quantity of employment for labor would also be increased; and the expense of it would be compensated by the decrease of shipwrecks, and the increased durability of the vessels. We should produce by mechanism, a supply of metallic material, to supersede the vegetable material produced by the chemistry of nature, saving thus both time and the interest of capital employed in planting."

Commerce of the West.—The Erie (Pa.) Observer, contains the following paragraph, which shows in a strong light, the advantages, which Erie harbor, has over that of Buffalo on the New York side:

We perceive that some of the papers of this state, predicate a belief, that vessels are deterred from going up the lake from this place by the fall winds, from the fact that a great number have been wind bound in Buffalo for several weeks at a time. The reason is not sound. Vessels may be and have been wind bound in Buffalo for weeks, while they could depart from this harbor, up or down the lake. Nearly every accident that has happened from gales, have been below this place; the lake being much narrower than it is above. Buffalo harbor is so situated that the wind, except from one or two points, will not permit vessels to go out, while from this place, there is scarcely any wind that will not admit of the departure of vessels; and there has not been a time during all this season, when vessels could not leave with safety for some port either up or down the lake. This, too, is the only harbor on the lake which could be *entered* by vessels during some of the gales this season.

The London correspondent of the New York Journal of Commerce, in a letter dated the 30th Oct., says:—

"You of course must be aware of the circumstance, that a magnificent line of Steam Packets is about being established between Liverpool and and New York.—The keel of the first has been laid, I believe yesterday, and the others will soon follow. The size of each steamer will be of the largest description, and will be furnished with four engines of extraordinary power. They are to be fitted up in splendid style, and no expense is to be spared in rendering them as far above the present packets, as those are superior to the ordinary sailing vessels. The first steam packet will be called THE LIVERPOOL, and it is expected it will be ready for sea in about three months. The calculation that has been made by several experienced gentlemen shows that a *nine* days passage may with certainty be relied on."

On Saturday evening last, a meeting was held at the Schuylkill Bank, of delegates from each of the State Banks in our city, to consult on the present condition of pecuniary affairs. It was resolved that all would do their utmost to afford relief; but the impression was nearly universal, that but little could be done. The restoration of the deposits to the Bank of the United States would be a certain remedy. There is none other which would meet the exigencies of the present period. This seems to be generally known and admitted. We may hope that Congress will insist on the measure, notwithstanding the profligate doctrine which is in substance preached to that body in several of the Jackson papers.—*Nat. Gaz., Dec.* 10.

"Though you disapprove of the Removal of the Deposits, you should not think of restoring them, because this would balk the President, and, perhaps, injure the party! No matter what communities may be ruined—what distress may pervade the country—how far the contract with the Bank, and the laws, have been violated—beware of vindicating the faith of the government, redressing a wrong, and averting national calamity, for, in so doing, you will disconcert the schemes and defeat the malignity of the Kitchen Cabinet."

FROM MADRID.—Madrid papers to the 22d Oct. have been received at this port by the ship Logan, Captain Atkin, from Cadiz, whence she sailed on the 1st November. Madrid was quiet, but insurrection was rife in the provinces. It was reported at Cadiz that Don Miguel had evacuated Portugal and gone to help his hopeful friend Don Carlos.—*Phila. Herald.*

The Life of General A. Hamilton, by his third son, John C. Hamilton, Esq., is now in the press at New York.—*Nat. Gaz., Dec.* 10.

BURDEN'S NEW STEAMER.

We announced, some time since, that Mr. Burden, a distinguished machinist of Troy, was constructing a steamer on an entirely new plan, from which great advantages were anticipated; it was to be some 300 feet long, with two hulls, shaped thus ()() (as nearly as we can define it by 4 parenthesis types,) or not very unlike two cigars placed parallel to each other, on which the boat rests, with the paddles between the two. By this arrangement the whole force is retained as the water cannot escape at one side, and as the boat draws less water than others of the same size, it incurs less resistance from the same; those who have observed the Brooklyn Ferry Steam Boats, will readily understand us, as the plan is much the same.

The boat is now complete, and the first experiment was made on Wednesday week, of which the Troy American thus treats:

After a sufficient quantity of steam had been generated, the boat was put in motion, come up to this city, then turned and went down a mile or two below the city of Albany, and returned to its starting place. Its speed was at the rate of 15 miles an hour, with but 7 revolutions of the water wheel per minute. The engine is calculated to make 25 evolutions per minute when necessary. All who were on board the boat were astonished at the ease and rapidity with which it passed through, or rather over the water. Mr. Burden admitted that it surpassed his own expectations.

The Troy Daily Press gives us the following additional facts, which are not uninteresting at this time.

She has but one engine, and her cylinder is 24 inches in diameter. The Novelty has two cylinders, 30 inches diameter each; and the relative power applied to the two boats, are, as 452 to 1413.

We state this to give an intelligible idea of the *quantum* of power used by Mr. Burden.

The engine, at her first experiment, on Wednesday, made frem 8 to 10 revolutions per minute; and in an experiment made yesterday, she made 16 revolutions per minute—the revolutions are capable of being increased to 28. The number of revolutions per minute, give the boat,s speed in miles per hour.

The rudder is a temporary one, and yet the boat turns in less space than ordinary boats. The reason is, that this boat turns upon her centre, that is in a circle, the centre of which is at the centre of the boat; a common steam boat turns upon her stern, that is, in a circle, the centre of which is the helm. Mr. B's boat can be steered with the greatest ease, upon any given line or point. There is no such thing as sheering. Most of the accidents which happen with ordinary boats, in running aground or afoul of other boats, arise from the fact of their sheering, they are not obedient to the helm, (though of the dimension of 18 feet by 5) and get the advantage of the pilot. Mr. B's furnace to his boat will exhaust but 8 cords of wood to the trip. These, let it be remembered, are the result of experiments, while the boat is yet incomplete, and the machinery in *an unfinished state.*—*N. Y. Int.*

Extract of a letter to the editor of the United States Gazette, dated

Washington, Dec. 12, 1833.

Mr. Clay and Mr. Calhoun appear to be on a very intimate personal footing, which is regarded by most persons as an indication that they will be found hereafter acting and voting together on political questions. On the subject of the appointment of Committees in the Senate, and the Public Deposits, they have hitherto gone together. But there are sufficient indications that Mr. Clay and Mr. Webster will not be very fraternal in their co-operation. They are both men too high minded, too patriotic, to suffer any personal feelings to interfere with their public duties, on questions of great magnitude. But it is plain that they are disposed, whenever they may have an opportunity, to shiver a lance with each other, with an earnestness which somewhat exceeds the feelings of friendship. There is a flush on the cheek of Mr. Webster when he rises to differ from Mr. Clay, as he has already twice done—once on the phraseology of his call on the President yesterday, and again on the postponement of the election of Committees to day; which discovers too plainly the condition of the feelings within. And there is an excited expression in the countenance of Mr. Clay when he rises in reply, which tells of hasty indignation. It is to be wished that by the intervention of friends, this incipient bud of hostility could be nipped, blasted, and destroyed forever; because, cherished, it may be productive, in its maturity, of very pernicious fruit. I suppose that the division on the subject of postponement may be taken as pointing out with tolerable accuracy, the adherents of Mr. Webster, and those of Mr. Clay; Mr. Frelinghuysen, Mr. Knight, Mr. Prentiss, Mr. Robbins, Mr. Silsbee, Mr. Smith of Conn., Mr. Swift, and Mr. Tomlinson, making seven of the N. England delegation voted with Mr. Webster; and Mr. Bell, and Mr. Sprague, went with Mr. Clay. The test, however, may be merely an imaginary one.

Extract of a letter from a republican member of Congress of the Middle States, to a friend in the city of New York:

"Don't be alarmed at the present appearance of the House of Representatives. There is the strongest prospect, ultimately, of the complete triumph of the liberal democrats over the trading politicians of the under Cabinet."—*Star.*

Board of Trade.—A numerous meeting of the Philadelphia Board of Trade was held last evening, at the Merchants' Coffee House; at which the able and stisfactory Report of the Warren Convention, after having been read, was ordered to be published.

The Board at present consists of near 400 firms, or about 600 members.—*Phila. Herald, Dec.* 17.

An Enigma, said to have been written by Mr. Canning, and which for a long time baffled all England to solve:

"There is a word of plural number,
A foe to peace and human slumber.
Now any word you choose to take,
By adding S, you plural make;
But if you add an S to this,
How strange the metamorphosis;
Plural is plural then no more,
And sweet, what bitter was before."

SOLUTION OF THE ABOVE.

"CARES" are a foe to human sleep,
And mark the face with furrows deep;
But if to cares you add an S,
"How strange the metamorphosis;"
Your "cares" are gone, and in their place,
Behold! you have a sweet "CARESS."

It is said that a bill is about to be introduced to Parliament, allowing the Princess Sophia to marry Sir Henry Halford.

The history of indigo in America is very curious. At one time it was the second stable produce of Carolina. Mrs. Pinkney received some indigo seeds for her garden from her father, the governor of Antigua. She planted them in March 1742—the indigo was cut down by the frost—she planted again in April, and it was lost again; she tried again, and having succeeded, she distributed the seed. Hence the culture became common, and in a few years it was an article of export.

The Venerable Bede.—This learned monk was born in the year 672, and may well be called the Father of Ecclesiastical History. His whole life, almost literally from the cradle to the coffin, was spent in literary labors. Besides his celebrated Ecclesiastical History, which was the fruit of the labor of several years, he published a multitude of other works, all of which had a tendency to benefit and enlighten mankind in the darker ages.—He died of a consumption and asthma at the age of sixty three. It is related of him that during his last severe illness, his mind being clear and unclouded, he did not relax from his accustomed literary exercises. The evening of his death he spent in translating the Gospel of St. John into the Saxon language. At length his amanuensis said "There remains but one chapter, it seems very irksome to you to speak." "O no," said the venerable Bede, "It is not difficult. Take a pen, dip it in the ink, and write as fast as you can. I have no time to lose." Some time after this, the young man who wrote for him said, "There is now, master, but one sentence wanting." Upon which the dying man bade him write quick. Soon after, the young man said, "It is now done." To which Bede replied, "Well hast thou told the truth—it is now done. Take up my head between your hands, and lift me—because it pleases me to sit over against the place where I used to pray, and where now sitting, I may yet invoke my father." His wishes were gratified, and being seated according to his desire, upon the floor of his cell he said "glory be to the Father, the Son, and the Holy Ghost." As he pronounced the last word he immediately expired.—*Lowell Journal.*

AMERICAN QUARTERLY REVIEW.

*** The Subscribers have undertaken the publication of the American Quarterly Review, of which the 28th number is just issued. The appearance of this number has been delayed, by accident, a fortnight beyond the stated period; but arrangements have been made by which that punctuality will be constant hereafter, which hitherto has been observed with one or two exceptions only, and these of a very few days.

The American Quarterly Review was established 7 years ago, and now consists of fourteen vols., in octavo, averaging, perhaps, 575 pages each. It has been conducted with studied impartiality, according to the promise of the Prospectus. Discussions of nearly every one of the great questions on which the country has been divided in opinion, are to be found in it; and all the different views taken of them have been admitted. Thus, there are elaborate and able articles for and against the Tariff system, the Abolition of Negro Slavery, Anti Masonry, and so forth.

The other subjects of enquiry or controversy most interesting to an American reader, such as Constitutional Law, State History, General Statistics, Penal Law, Internal Improvement, Public Lands, Colonial Trade, the States of this Continent south of our Union, Education, Systems and Codes of Jurisprudence, Banks and Currency, Poor Laws, Laws of Contract, of Marriage and Divorce, have been treated by writers who possess the highest reputation and most effective talents. Adequate investigations have been pursued of the discoveries and advances in the different department of science, and particularly of the labors of tavelers and explorers. Many pages are devoted to German, French, and Italian literature; to the Fine Aarts, Music chiefly; to the new Memoirs biographical and historical, and the politics of foreign nations. Whoever shall examine the contents of the Review from the beginning, will see that it is sufficiently *American;* by which is meant that due attention has been paid to the matters and books that could be deemed to concern the American reader, as domestic. The editor has endeavored uniformly to furnish what would be most useful as well as interesting to the American public. To shew how far reliance may be placed on the general merits of the Review, a list is subjoined of gentlemen who have furnished articles.

Messrs. John Q. Adams, P. S. Duponceau, Albert Gallatin, Timothy Pitkin, William Rawle, H. Wheaton, J. K. Paulding, George Ticknor, John Pickering, George Bancroft, Charles J. Ingersoll, T. I. Wharton, T. A. Budd, H. Tanner, G. W. Irving, J. R. Poinsett, Achille Murat, Wm. B. Reed, L. Da Ponte, I. Lea, Jas. Bayard, Wm. M. Meredith, G. W. Featherstonehaugh, Harrison of New Orleans, Wm. B. Lawrence, T. Walker of Cincinnati, the late Mr. Cruse of Baltimore, the late Senator Josiah Johnston, S. Ward, the Eckards, David P. Brown, H. D. Gilpin, G. M. Wharton, Jules de Wallenstein, H. Brevoort of New York, Isaac Candler, F. Markoe, jr., Antony Laussat, Robert Hare, jr., Sidney G. Fisher, R. Walsh, Major W. Ware—Judges Hopkinson and James Hall—the Messrs. Alexenders of New Jersey, the Rev. Dr. Beasley, Rev. President Wayland, Rev. Dr. G. Bedell—Professors J. Renwick, A. M'Vickar, Robert Patterson, Hare, Wm. H. Keating, Tucker of Virginia, Follin of Cambridge, Dew of Virginia, Caldwell of Lexington—Doctors Dunglison, James, Godman, Cooper, Leiber, Bache, J. K. Mitchell, Meigs, Elwyn, La Roche, M'Henry.

This list is yet incomplete. It is confidently expected that not a few of the writers named, and others of the like qualications, will continue to employ their pens occasionally for the Review. The pecuniary compensation hitherto paid for articles, and which will be allowed for the future, is believed to be as great as any Journal of this description can possibly afford. The editorship remains in the same hands. The work will be printed in the best manner.

The subscribers hope therefore, for a continuance and enlargement of patronage. Full sets of the Review may be had of them at their store, No. 23 Minor street.

FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

Nov. 8, 1833. MOSES ATWOOD.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
	other lots, containing about		6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county---and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others--- a soil rich and productive---the neighborhood abounding in coal---well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

SATIN BEAVER HAT MANUFACTORY,

NO. 6 ST. CLAIR STREET,
PITTSBURGH.

WILSON & SMITH, from N. York,

RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

Wholesale Dealers supplied at the same prices as in the New York markets.

DOCTOR ROBERT'S

☞*WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S

COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradully increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio, except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.
